# KALSTEIN® Hematology Reagent

## Hematology Reagent

Model YRA45 // YRA71

### Product Description:

- ✓ Laboratory chemical reagents are chemical substances used in laboratories to determine the content of other substances, the distribution of sample components, to perform analysis, synthesis and finally to carry out research and scientific work.
- ✓ This product is the cleaning solution of the reaction system in the detection process of the blood cell analyzer, so as to facilitate the in vitro detection of blood cells, hemoglobin, etc.
- ✓ It is used to destroy red blood cells, dissolve hemoglobin, and maintain the shape of the cells to be analyzed before blood cell analysis, thereby facilitating cell classification and counting or quantitative determination of hemoglobin.
